

Approved list of Pharmacies supplying Emergency Hormonal Contraception, as of November 2023

If you have had unprotected sex (no condom), or your normal contraception fails (e.g., split a condom, been sick after taking your contraceptive pill): emergency contraception (EHC, 'morning after pills') helps prevent unwanted pregnancy. EHC can be taken up to 120 hours after unprotected sex. The sooner it is taken the more effective it is:

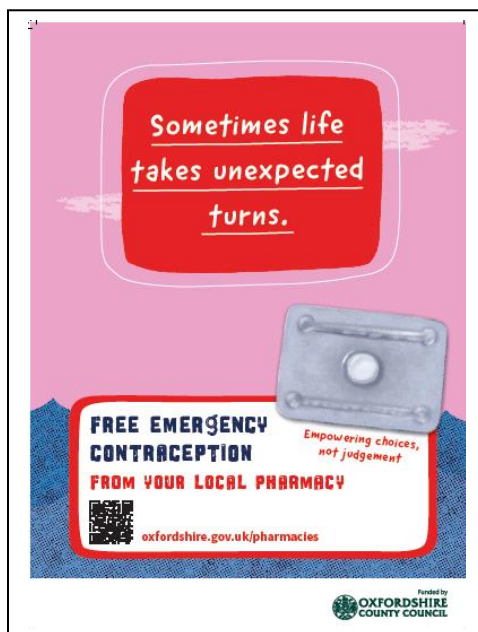

- Within the first 24 hours after unprotected sex it is 95% effective.
- Within 48 hours it is 85% effective.
- Within 72 hours it is 58% effective.

Call ahead to check there is a trained and approved pharmacist available to give you EHC. Sometimes they may be on a break or on holiday.

It may also be possible **to have the consultation over the phone**, if that is more convenient to you.

You can also get EHC from your local [Sexual Health Clinic, School or College Health Nurse](#) or GP (doctor) for free or if it has been up to 120 hours since unprotected sex.

Tell the pharmacist that it is an emergency, and you need Emergency Hormonal Contraception. **Please always try and phone before you visit the pharmacy for emergency contraception just to make sure there is a suitably trained pharmacist available.**

The following list of pharmacies have been confirmed as providing EHC within the past 6 months. Sometimes pharmacists can change and may no longer be able to provide the service. Other pharmacies may also join the scheme, so look out for this poster.

| Pharmacy | Pharmacist(s) | Address | Contact Number |
